

# Practical training. Confined Space Entry

Confined Space Entry is one of the most dangerous jobs around. Repairs, inspections, maintenance and cleaning work are tasks in which personnel typically find themselves in direct interaction with machinery. This type of intervention interrupts production processes and gives rise to new hazards which are not experienced under normal operating conditions and, in many cases, fail to be recognized by workers. For this reason, thorough training and regular instruction (current guidelines recommend that) are essential.

**Mobile training gallery:**  
Training can take place on site at your premises.

**Confined space entry:**  
Safety is guaranteed thanks to thorough preparation.

## TARGET GROUP

Personnel who are required to enter confined spaces.

The Participants will acquire a basic knowledge of the hazards and dangers associated with working in confined spaces, create and work to a safe system of work and are familiarized with the rescue techniques.

## CONTENTS

- Theory and practical exercises in a mobile training gallery
- Possible use of respiratory protective and gas detection equipment
- How to handle the rescue and safety equipment used in confined spaces
- Handling of personal protective equipment to protect against falls
- A brief overview of the legal situation
- Rescue techniques

## REQUIREMENTS

- Experience in the area of confined space entry
- Preferably, participants should have undergone a medical check-up (e.g. G26, Group 3 in Germany) and have been given the all-clear to take part in exercises involving respiratory protective equipment
- All that is needed is an open space measuring 10 x 10 m (either outdoors or in a suitable hall) and a power outlet

## DURATION

1 day

## DATES AND PRICES

Upon request

## NUMBER OF PARTICIPANTS

Max. 8

## PLACE

Mobile, on site
